

## **Sage**

Sage came into HANR rescue after being abandoned along with her brother Snickers. The pups were found wandering in the country and were taken in by a local farmer who contacted HANR. Sage went to Everett W. for fostering. Within 2 days Everett decided she "was a keeper" and adopted her.

Sage is coming along nicely, although currently she is something of a work in progress. I believe she is now about five months old. When I got , she was suffering from demodetic mange -- that is now cleared up and she is starting to get her coat back, is putting on weight and is starting to look like a Newfie.

She and Dori got along wonderfully from the start and enjoy playing Wreck the House. Later this month she'll be starting obedience training.
